Do You Know Commotio?

Commotio cordis: #2 Killer in Sports

“We were lucky. There was an AED near the field and only quick thinking among a few strangers saved his life! He can’t play soccer anymore and that has been very hard on him.”

Patti Newhouse
Soccer mom of commotio cordis survivor

Millions of youth athletes ages 6-18 are at risk.
Any player. Any position. Any sport.

UNEQUAL® CHEST AND HEART PROTECTORS

Proven to Reduce Risk of Commotio Cordis

FDA IFU CLAIM STATES:

“When incorporated into a suitable garment and worn in accordance to instruction, the HART CC (commotio cordis) Pad device has been shown to reduce the mechanical impact received by the chest that may facilitate the reduction in risk of commotio cordis.”

Tufts TESTED

The Tufts Medical Center tested HART tech and deemed it effective in greatly reducing risk of commotio in a peer-reviewed, published study, Clinical Journal of Sport Medicine.

Advanced Technology

CLINICALLY TESTED • PROVEN EFFECTIVE

LAYER 1 — UNEQUAL IMpacSHIELD®
Thermoplastic composite (polypropylene polymer)

LAYER 2 — UNEQUAL TRIDUR® ARAMID FABRIC
Flexible, elastomer coated

LAYER 3 — UNEQUAL ACCELLERON®
Green, high-density elastomer foam

LAYER 4 — UNEQUAL AIRILON®
Grey, low-density elastomer foam, against body

What is commotio cordis?

• Commotio cordis is sudden death caused by a random, non-penetrating blow to the chest by a ball, bat, stick or hand.

• Commotio cordis is the #2 killer in sports with 40+ million young athletes ages 6 to 18 who play contact sports at risk.

• Sports with at-risk players: Baseball, Softball, Lacrosse, Hockey, Soccer, Martial Arts, Football, Cricket, Basketball and other contact sports.

COACHES
You have a duty of care to inform parents. This technology can safeguard their kids.
